# ABOUT US

At Royal Power and Energy (RPE), we understand the transformative power of energy in driving economic growth and improving lives. With over two decades of experience, we are committed to making sustainable, accessible, and widely distributed power a reality.

Founded on a commitment to excellence, we combine cutting-edge technology with decades of industry expertise to meet the evolving needs of our customers. With a strong emphasis on social responsibility and environmental sustainability, we always strive to create lasting value for our business, stakeholders, and the communities we serve.

# CEO'S Message

## Adewale Odugbesan

For over two decades, we have been at the forefront of Nigeria's renewable energy sector, pioneering sustainable power solutions that drive economic growth and improve lives. Our unwavering commitment to innovation and sustainability has positioned us as a trusted leader in delivering clean, reliable, and future-ready energy for businesses, industries, and households across the nation.

The key to our success is our dedicated team of experts—passionate individuals who bring innovation, expertise, and an unrelenting drive to everything we do.

As we continue to evolve in an ever-changing energy landscape, we remain focused on expanding access to sustainable power, investing in advanced technologies, and strengthening partnerships that enable progress. Our goal is clear: to illuminate a path toward energy security, economic empowerment, and a greener tomorrow for all.

## OUR PRESENCE

At RPE, we have a truly nationwide footprint, delivering cutting-edge power solutions across Nigeria and beyond.

With a robust network of highly skilled engineers, technicians, and support teams, we seamlessly design, deploy, and maintain integrated solar, power backup, and hybrid power systems. Whether in urban centers, remote communities, or industrial hubs, our commitment to excellence guarantees swift service, flawless execution, and unwavering reliability.

Wherever you are, we are there - powering possibilities

# OUR BUSINESS PROCESS

01

## Audit

We begin with a thorough assessment of your site's power and energy consumption, identifying inefficiencies and opportunities to enhance performance.

02

## Conceptualization & Design

Our team leverages modern technologies to create customized energy solutions tailored to your unique business needs.

03

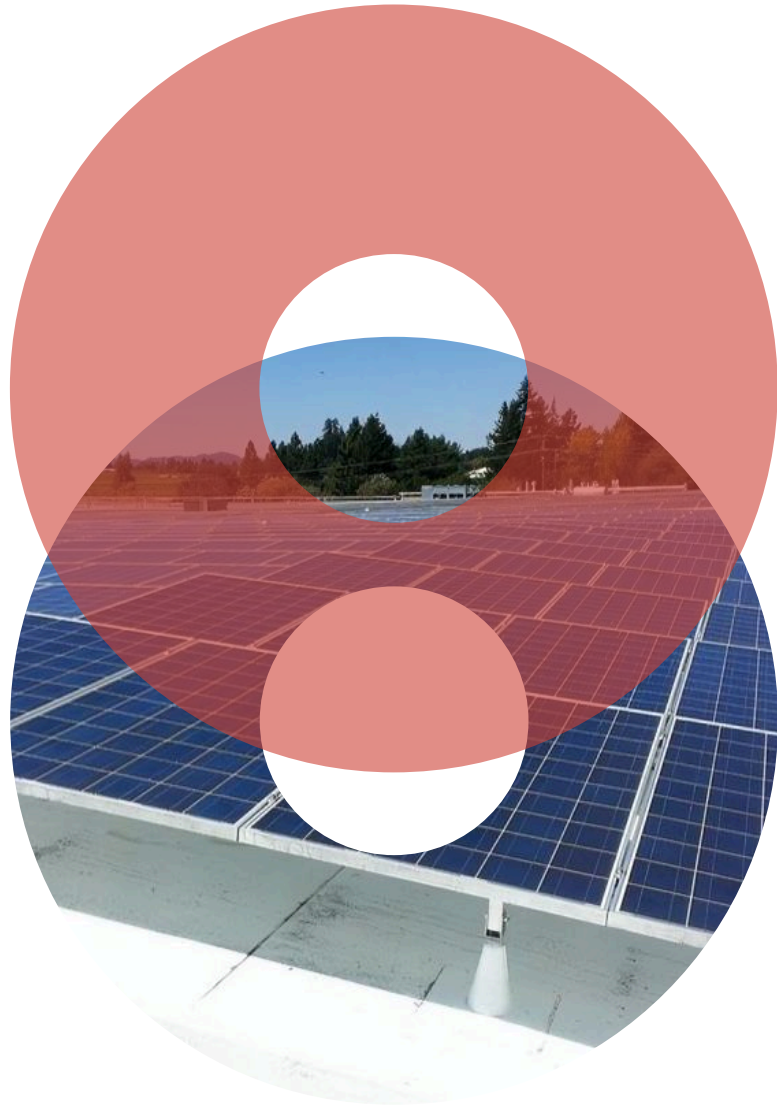

## Installation

Our experienced field engineers handle the installation process with precision, ensuring strict compliance with industry safety standards.

04

## Periodic Check & Maintenance

We provide regular, non-intrusive inspections to keep your system running efficiently, ensuring long-term reliability and performance.

# OUR SERVICES

## Energy Efficiency

Customized analysis and strategies to optimize energy consumption, reduce costs, and enhance operational efficiency.

## Power Backup

Reliable UPS systems and solar inverters ensure uninterrupted power for businesses, whether standalone or integrated into a backup system.

## Renewable Energy

Sustainable solutions, including solar, cogeneration, energy storage, and efficiency improvements, tailored for long-term impact.

## Power As A Service (PaaS)

Flexible, cost-effective energy solutions without upfront investment, allowing business to scale efficiently.

# OUR SERVICES

## Storage

Reliable, high-performance storage solutions tailored to diverse power needs.

## Engineering, Procurement & Construction (EPC)

End-to-end energy services—from design to deployment—built on deep industry expertise.

## O&M Preventive Maintenance

Scheduled maintenance that boosts efficiency, cuts waste, and extends system life.

## Remote Monitoring

Real-time oversight for safe, efficient, and optimized energy performance.

# RECENT WORK

01

## 1MW Solar Hybrid Plant

Our 1MW solar and storage hybrid captive plant delivers scalable, impactful energy infrastructure that benefits industrial and residential stakeholders.

02

## Switch Rectifier Solution

This nationwide project for our major Telecom client features high efficiency Rectifiers with Lithium battery storage. Total installed capacity of 2.04MW and storage capacity of 2.46MWhr.

# RECENT WORK

03

## Renewable Energy Solution

Our rooftop and ground mounted solar project in Oyo state. We used state-of-the-art solar technology for maximum efficiency.

04

## Lithium-Ion Storage Solution

Our Lithium-ion installation at a healthcare facility ensures uninterrupted energy for life-saving equipment.
